ABOUT RAMATEX

Since 1992, Ramatex International has been manufacturing an environmentally friendly line of blankets, garments and accessories made from 100% pre-consumer recycled fibers.

Ramatex has helped change the way consumers buy; instilling a consciousness about preserving the Earth, recycling and purchasing products made up of recycled contents to close the loop.

Ramatex International manufactures a line of garments and blankets made with Eco-Yarns®, a fabric made from 100% pre-consumer recycled fibers. The fibers in this fabric are woven in a unique pattern to allow for extra breathability while creating tiny pockets that store and maintain warm air. Eco-Yarns® allows your body to breathe while keeping its warmth.

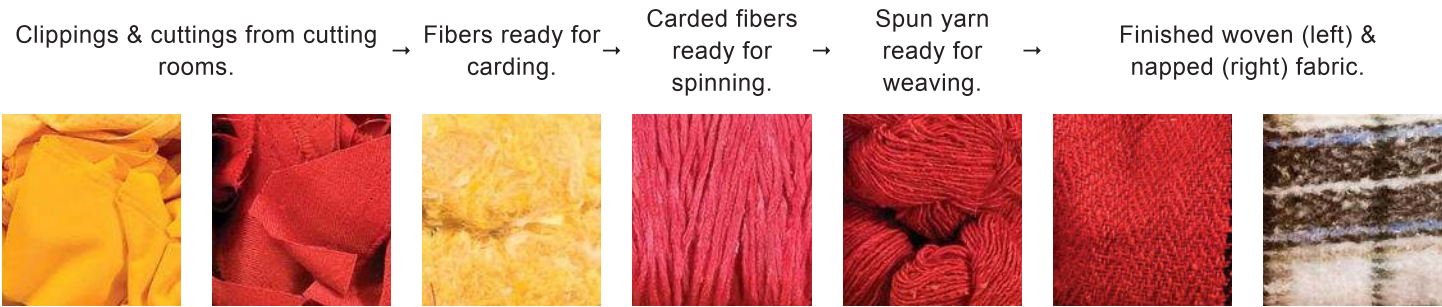

For every Ramatex garment that you purchase, you are preventing up to 2.4 lbs of textile material from going into landfills. This number increases up to 7.2 lbs for every blanket you purchase.

CUSTOMIZATIONS

At Ramatex International we have a multitude of options for product customization! All done in-house, here are all of the custom options we provide:

ABOUT

At Ramatex International, we're dedicated to providing affordable and eco-friendly custom printing solutions. We specialize in creating unique graphics for both blankets and large towels, all of which are printed completely in-house. Our blankets come in standard throw (50" x 60") and/or twin (60" x 80") sizes, as well as four different plush fabrics. Check out our available printing methods and other options for your next project!

SUBLIMATION CMYK

Sublimation printing is a process that involves first printing the desired image onto a special paper before transferring that image onto another material by superheating the ink into a gaseous state.

DIGITAL CMYK

Digital printing refers to methods of printing from a digital-based image directly to a variety of media. In this case, it would be fabric.
